Mobile Career Center Promotes Dual Enrollment in Ft. Payne

The Alabama Career Center's Mobile Career Center will be on-site at the Ft. Payne Career Center to help promote the "dual enrollment" program to high school students this evening from 3:30 – 7 p.m.

"The dual enrollment program is for eligible high school students who can begin taking college or technical courses to better prepare themselves for life after graduation," said Linda McCain of the Ft. Payne Career Center.

According to McCain, the program is open to rising high school juniors and seniors who meet eligibility requirements, and enrollment must be completed 30 days before a student wants to begin taking classes.

McCain said that an event on Tuesday night turned out to be successful, with about 18 students filling out paperwork to enroll in the program. McCain said most of those who applied are expected to meet the registration requirements.

For those interested in the dual enrollment program but are unable to attend today's informational meeting, please visit the Ft. Payne Career Center during normal business hours or call (256) 845-2900.
